Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on 6/28/2006 has been entered.

Claim Objections

2. Claims 7-9 are objected to because of the following informalities: "wherein" in line 2 of each claim should be changed to --further comprising-- as applied to claim 5 in the previous office action. Appropriate correction is required.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-5 and 7-9 are rejected under 35 U.S.C. 102(b) as being anticipated by Shusen et al (CN 1285249A (English translation accompanies this office action)).

Claim 1:

Shusen teaches a manufacturing method for forming a frame body that forms a metal frame body comprising the steps of ring rolling a metal to form a ring shaped member (figure 4), forming a rectangular member by pressing and deforming the ring-shaped member in radial directions thereof (figure 6), placing the rectangular member in a mold and pressing and die forging the rectangular member (figure 7 and claim 1).

Claim 2:

Shusen teaches that when the rectangular member is formed the angle of a corner portion that imparts the rectangular shape to the rectangular member is made smaller than the angle in the frame body after die forging (figure 6).

Claims 3 and 4:

Shusen teaches that when forming the rectangular member an insert is disposed inside the ring-shaped member (figure 6).

Claims 5 and 7-9:

Shusen teaches that the height of the pre-form, i.e. rectangular member is a critical factor in the process and that the height must be the height of one pre-form before it is inserted into the mold to be forged. Therefore if the rectangular member were to be of a height greater than one rectangular member, i.e. a plurality of frame bodies, the rectangular member would be cut at a height equivalent to the one frame body to be die forged separately (last paragraph on page 6-page 7 of supplied translation).
